The Light Source
Mega-Grapple

Made in the USA, the Mega-Grapple is made from billet aircraft 6061-T6 aluminum. It is perfect for creating “T” sections of box truss. Sold in pairs with two 5/8” x 4” bolts, washers, nuts. Includes spacers to protect the truss.

The load capacity of the inline truss will carry 75 percent of the manufacturer’s load rating. The primary truss must have point load calculations taken into consideration. The secondary trusses must be supported at both ends. Cantilevering of truss is not recommended.
