The Light Source
8 x 8 Light Mount

The LM8X8 is a low-profile floor stand that comes with 6 pre-drilled holes for securing a fixture in place. The fastening holes will take up to a 1/4" fastener and will also work with sheetrock screws. The LM8X8 can be fastened to stage decks, props, walls, and ceilings. It is large enough to hold most light fixtures without being bolted in place. This allows it to be moved around to the perfect placement before it is secured. A 1" deep thread engagement post is welded to the center of the clamp. The LM8X8 is laser cut and formed from 3/16" thick 5052 aluminum alloy. It is available in black, silver, and white.

Hardware	1/2"-13 x 1" hex head bolt grade 5
Dimensions	8" x 8" x 1.2" tall by 3/16" thick
Weight	1.5 pounds
