The Light Source
Mega-Cable Carrier

The Mega-Cable Carrier gives you a channel to drop your cables into above the batten or grid. The Mega Cable Carrier has a 1/2" mounting hole and is bolted to a clamp. The assembly is then fastened above a pipe batten or grid to run cables. The cables are then located over the pipe, giving you clearance to hang your lights without having to fight the cables, or to worry about messy tie lines.

The Mega-Cable Carrier will fit on the Mega-Clamp as well as many of our other clamps. The Mega-Cable Carrier is totally reusable, or may be permanently installed.

Working Load Limit	100 Pounds
Dimensions	2" across x 2-1/4" tall x 5" wide
Weight	.37
Case Quantities	each
