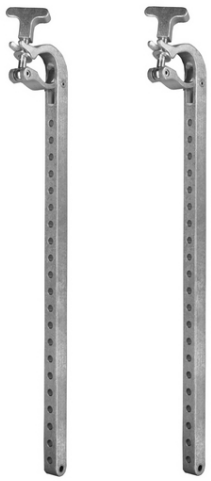
The Light Source
TC Plasma Mount



The TC Plasma Mount is used to hang a plasma or LCD screen on a box truss or pipe. A pair of mounts are provided, one for each side of the screen.

The screen is easily bolted to the TC Plasma Mounts with 6mm, 8mm, or 10mm bolts. (Bolts are not included.) The thickness of the TC Plasma Mount is about 23mm. To size the bolt length needed, find out how deep the fasteners thread into the screen in mm and add this to the 23mm length to get the maximum bolt size. (12mm threaded into screen + 23mm thickness of TC Plasma Mount = 35 mm maximum screw length.)

The support bolt holes are drilled on 25 mm centers to match the 50, 100, 150, 200, 300, and up to 400 mm VESA Standards.

The TC Plasma Mount fits 1.5" OD - 2" OD Tube.

Minimum Size	1.5" OD
Maximum Size	2" OD Truss Tube
Working Load Limit	300 Pounds per pair
Hardware	None
Dimensions	1 x 4 x 26.8
Weight	4.95 lbs.
Case Quantities	Sold as a Pair

Order Codes

TPM TC Plasma Mount, Silver
TPMB TC Plasma Mount, Black Anodized
