The Light Source
XL Mega-Truss Dolly, Outside Couplers

The Mega-Truss Dolly XL with Outside Couplers now has the most requested upgrade--four wheels and a wider base. The four castors provide extra stability when moving the truss dolly over obstructions and allows for moving and unloading truss without strapping for each move.

The two attached Mega-Couplers fasten to the outside cord of the outside trusses, securing the load.

Convenient handle cutouts on both sides of the dolly allow for carrying the dollies after unloading. The Mega-Truss Dolly XL with Outside Couplers has the same e-track tie downs to hold the truss as the traditional Mega-Truss Dollies.

The XL Mega-Truss Dolly with Outside Couplers is laser cut and formed from 5052-T6 aluminum material. Castor capacity is 3,200.

Dimensions	7" tall x 16" x 48"
Case Quantities	pair
