

The Light Source

Mega-Coupler Parts

BOLT ASSEMBLIES

Mega-Coupler Bolt Assemblies include the Mega-Coupler swivel bolt, a 1/2" SAE washer, and a 1/2" nut. Also available in stainless steel.

HARDWARE PACKS

Sets of bolts, nylock nuts and Belleville Washers.

Packs for 1/2" Mega-Couplers include 12 sets.

Packs for 3/8" Mega-Couplers include 24 sets.

SPIROL PIN

The spirol pin locks a Mega Swivel Coupler into a 90 degree position.

METRIC

Countersunk Mega-Couplers can be converted to metric using metric bolts and nuts.

The M-12 fits the 1/2" Countersunk Mega-Coupler.

The M-10 fits the 3/8" Countersunk Mega-Coupler.

WING NUTS

The Light Source wing nuts are available for OEM products. They cannot be used as a replacement nut on the Mega-Coupler since the wing nuts are permanently attached to the bolt to prevent loss. To replace a wing nut, the bolt and wing nut assembly must be used.
